

## **M6 Robotic Laser and Rapid Release Testimonial**

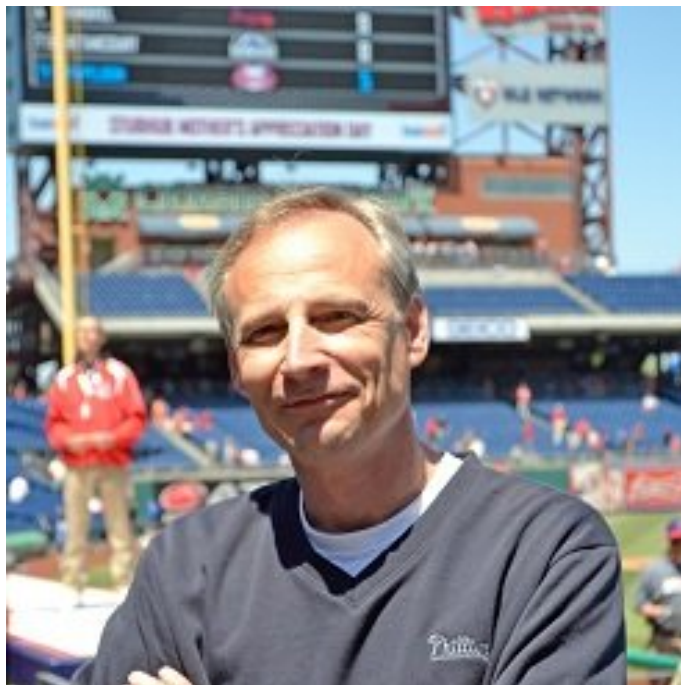

### **Name, City, Occupation:**

William "Bill" Kulik, Moorestown NJ  
Sports Announcer for the Philadelphia Phillies

### **What pain did you have before being treated with Rapid Release and the M6 Robotic Laser?**

I'm still very active, running 3 or 4 times a week and coaching my kid's baseball teams. I was having problems with the outside of my knee. On a scale of 1 to 10 my pain was a 7 or 8.

**How did that pain affect your life?** Not only was my pain affecting my daily activities but also it had grown to point that "rest" and inactivity was becoming an issue. I had trouble getting up in the morning with my knee feeling very tight. The problem also crept up on me during when I traveled, and I do lots of traveling with the team. Sitting for 2 or three hours would make my knee cranky and stiff. During exercise I had to be careful of which type of exercise I tried to do. I was very limited in what I could do.

### **How do you feel now after Rapid Release laser and M6 Robotic Laser sessions?**

I can't brag enough for both of them. My very first session with the Rapid Release made me feel like I had a new knee. I left the office with a big smile on my face. It brought back flexibility and my pain was decreased dramatically in my first session.

### **What positive affect did it have on your daily activities now?**

Outside of the obvious day-to-day relief (which I cant say enough about) I can now return to normal exercise and coaching activities. For example, I had eliminated Squats from my workouts and I now have full range of motion and can add them back into my routine. I am also back to working with my pitchers when I coach. I can get into catchers crouch and catch their bullpen sessions, which is critical when trying to evaluate and coach a kid. Getting up and down is no longer an issue.

### **How do you feel about the results when the treatments are paired together?**

Rapid release helps loosen things up immediately, for a quick fix, like a shot of adrenaline. But, that shot seemed to wear off after a day or two. The M6 laser has now helped me to stay pain free for a week and often longer. Each week I seem to get stronger. I am getting to the point where I enter the office pain free. The laser seems to be more long lasting. The Rapid Release and M6 Paired together work very well. I am not a doctor, but I think one gives you immediate relief and one gives you longer lasting satisfaction.

***Bill has completed 4 sessions of the M6 laser, and the rapid release 7 or 8 times.  
The lasers have improved with both Bill's business and personal life***
